

HL2 | GENERAL INFORMATION

2" aperture direct/indirect acoustic panel luminaire

Project: _____ Type: _____

FEATURES

The HL2 direct/indirect luminaire is designed to enhance interior spaces with subtle to bold colors, while damping sound reflections. The 2" wide aperture fixture is clad with 1/2" thick felt acoustic panels in 8", 12" or 16" heights and twenty standard colors. Machined aluminum end caps are available in several architectural finishes, as well as optional RAL finishes to coordinate with panel colors. Add additional sound absorption in an architectural space with complimenting HB2 non-illuminated acoustic baffles.

SPECIFICATIONS

Fixture constructed of extruded aluminum, heavy gauge sheet formed steel and aluminum, extruded acrylic lenses and PET acoustic felt panels.

Model variations offered for cable suspended and wall mount applications as 2'-8' nominal single fixtures and continuous runs up to 50'.

The 1/2" thick, 100% PET (>75% recycled), fire rated (ASTM E84 Class B) 0.98 NRC acoustic felt panels feature a bottom beveled edge, extended ends and are available in twenty standard colors.

Unlit areas and standard machined aluminum end caps are available in standard powder coat finishes as shown below and optional RAL finishes coordinated to the panel colors.

Indirect Lambertian and batwing optic options are available.

Basic continuous run fixtures provided with 18 ga. wiring harness for 6 Amp maximum load (consult factory for runs requiring multiple circuits, sensor integration, etc.).

Standard integral 120-277V driver offered with 0-10V dimming or non-dim (other dimming driver options available).

Integral 120-277V emergency battery backup available for non-dim or 0-10V fixtures and operate the direct source in 4' sections within the run (consult factory for details and for compatibility with other drivers).

Standard light outputs range from 445 – 860 lumens per foot for the direct source and 455 – 1340 lumens per foot for the indirect source.

LEDs available in 2700K, 3000K, 3500K and 4000K, within a 3 step MacAdam ellipse, all with 90+ CRI typical.

Life: 50,000 hours L_{70} .

Limited five year warranty.

UL and C-UL listed for dry and damp locations.

2" aperture direct/indirect acoustic panel luminaire

ACOUSTIC PANEL COLOR KEY

HL2 acoustic panels are made from 100% PET (>75% recycled) colored felt fibers. The 1/2" thick, cohesive material construction traps sound waves and aids in reducing sound reflections within interior spaces (0.98 NRC). Lightweight and durable, the panels are also fire rated (ASTM E84 Class B). There are twenty colors which can be paired with six standard powder coat finishes or optional coordinating RAL colors.

Note: Ordering Code shown above color image.

Optional coordinating RAL finish for end cap and unlit areas shown in parenthesis.

RUN INFORMATION

Specify run length to the nearest one foot. Factory will configure using the least quantity of fixtures as close to the desired run length as possible without exceeding the length. Mounting points will be located to provide the most even appearance possible. Consult factory for other mounting options.

Runs to be confirmed with a shop drawing.
