

HL2

ACOUSTIC LUMINAIRE

The **HL2 direct/indirect luminaire** is designed to enhance interior spaces with subtle to bold colors, while damping sound reflections. The 2" wide aperture fixture is clad with ½" thick felt acoustic panels in 8", 12" or 16" heights and twenty standard colors.

BEVELED EDGE BAFFLES

Increases light distribution while minimizing glare and adding sophistication to the fixture's details

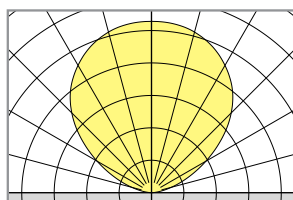

ACOUSTIC INTERIOR CAVITY

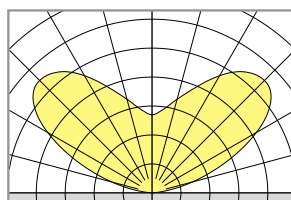

Minimal fixture structure creates air gap between panels for acoustic performance with 0.98 NRC performance

MANY FINISH OPTIONS

Twenty acoustic baffle finishes complimented with end caps in six standard powder coat colors or optional coordinated RAL finishes

Lambertian

Batwing

PERFORMANCE OPTICS

Indirect lighting available with Lambertian and batwing optic options

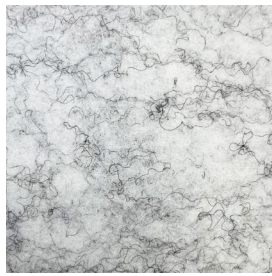

ACCOMPANYING BAFFLES

Add additional sound absorption in an architectural space with complimenting HB2 non-illuminated acoustic baffles
